## **DETAILED ACTION**

### ***Response to Amendment***

Applicant's after final amendment filed 10/5/2004 is entered as it places the application in condition for allowance. Claims 59 and 60 are amended. Claims 1, 4-60, and 62-74 are pending.

### ***Election/Restrictions***

This application is in condition for allowance except for the presence of claims 30-57 and 62-74 drawn to inventions or species non-elected without traverse. No allowed claim is generic to these claims, accordingly, claims 30-57 and 62-74 have been cancelled. Claims 1, 4-29 and 58-60 remain pending.

### ***Allowable Subject Matter***

Claims 1, 4-29, and 58-60 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1, 4-29, and 58 were previously allowed. See the action mailed 5/5/2004.

Regarding claims 59-60, there is not taught or disclosed in the prior art a fiber amplifier that inputs and amplifies seed pulses to produce amplified output pulses, where the temporal form of the pulses produced within or by the amplifier are parabolic.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Perry et al. reference cited herein discloses in Fig. 2 a temporal pulse that appears parabolic in shape, however the pulse is not produced within or by a fiber amplifier.
